

SURYAKIRAN MALI

AI Creative Director • Generative Media Producer • AI Film & Commercial Creator

Mumbai, Maharashtra | +91-7666550465 | suryamali007@gmail.com | linkedin.com/in/suryakiran-mali-771a43422/

ABOUT ME

Self-taught AI Creative Director with hands-on expertise in end-to-end generative media production, spanning AI-powered video commercials, UGC content, product visuals, and cinematic storytelling. Proficient in 12+ industry-leading AI tools across video, image and audio generation. Combines a strong engineering mindset with creative direction to produce brand-ready, high-quality content at scale without a physical production crew. Seeking a full-time role in AI Media, Creative Tech or Generative Content to redefine how commercial and cinematic content is ideated, produced and delivered.

TECHNICAL SKILLS — AI TOOL STACK

Video Generation:	Seedance 2.0, Kling 3.0, Wan 2.7, Sora 2, Cinema Studio 3.0
Image Generation:	MidJourney, Nano Banana Pro, Soul Cinema, GPT Image 2(DALL·E), Flux-2, Seedream
Audio & Music:	ElevenLabs (Voice/VO), Suno (Music Generation), Epidemic Sound
Post-Production:	DaVinci Resolve (Color Grading, Video Editing, Audio Mixing)
Scripting & Direction:	Claude AI, ChatGPT, Advanced Prompt Engineering for Creative Workflows
Engineering:	Python (basics), Systems Thinking, Mechanical Engineering (B.E.)

CREATIVE PROJECTS & PORTFOLIO WORK

AI Video Commercial Productions

Independent | Freelance/ Passion Project • 2025 – Present

- Conceptualized, directed and produced AI-generated video commercials from script to final render using Seedance 2.0, Kling 3.0 and Cinema Studio 3.0 delivering end-to-end commercial content without a physical production crew.
- Engineered advanced prompt sequences to direct scene composition, character consistency, camera angle and brand narrative, replacing traditional cinematography direction with AI-driven creative control.
- Integrated AI-generated voiceovers via ElevenLabs and original background scores via Suno and Epidemic Sound, producing complete audio-visual packages ready for brand distribution.
- Demonstrated the full commercial production pipeline from ideation, scripting, visual generation, audio layering and post-production colour grading in DaVinci Resolve as a solo creator.

AI Product Photography & Visual Campaigns

Independent | Freelance/ Passion Project • 2025 – Present

- Produced hyper-realistic product imagery and lifestyle campaign visuals using MidJourney, Nano Banana Pro and GPT Image 2.(DALL·E) eliminating the need for physical studio setups or photography crews.
- Applied Soul Cinema for character-consistent brand model integration across multi-asset campaigns, maintaining visual cohesion across hero shots, lifestyle imagery and social media creatives.
- Delivered production-ready visual assets including hero shots, lifestyle imagery and social media creatives at a fraction of traditional campaign production timelines and costs.

UGC-Style AI Video Content Creation

Independent | Passion Project • 2024 – Present

- Produced User-Generated Content (UGC)-style AI videos using Kling 3.0, Wan 2.7 and Cinema Studio, designed for brand storytelling and social media performance.
- Developed complete creative workflows from scratch to scripts, shot structures, visual personas and final renders using only AI tooling, from ideation to export-ready output.

- Created reusable prompt libraries and creative workflows for rapid content production, enabling scalable output for D2C and consumer brands.

CORE COMPETENCIES

-
- | | | |
|---------------------------|----------------------------|-------------------------------------|
| • AI Video Production | • UGC Content Creation | • Post-Production (DaVinci Resolve) |
| • AI Commercial Direction | • AI Product Photography | • Brand Narrative |
| • Prompt Engineering | • Audio & Voice Production | • Generative Media Workflows |
| • Visual Storytelling | • Creative Direction | • Solo End-to-End Production |

KEY STRENGTHS

-
- **Rapid self-directed learning** — independently mastered 12+ cutting-edge AI tools across video, image and audio generation with no formal training or prior creative background.
 - **Engineering mindset applied to creative production** — leverages systems thinking from a Mechanical Engineering background to build scalable, repeatable AI creative workflows.
 - **Solo end-to-end production capability** — can take a brand brief from concept to final commercial-quality output independently, replacing entire traditional production teams.
 - **Deep prompt engineering proficiency** — treats prompting as a creative language for directing AI-generated media, achieving precise, intentional visual and narrative outcomes.

EDUCATION

Bachelor of Engineering — Mechanical Engineering

Pillai HOC College of Engineering, Mumbai, Maharashtra | 2019
